

Please use this exercise:

Task description

1. Create a user registration form that consists of the following input fields:
 - Username
 - Email
 - Password
 - Password confirmation
 - Agreement checkbox
 - Register button
2. Save user data in the database.
3. Create a login form where the user can login to the system.

Task Requirements

1. Use Laravel Framework and MySQL database.
2. The form should be secure. Try to implement as many security checks as you can.
